

*Mrs. Poitras*

*By Davis and **Annika***

*We interviewed Mrs. Poitras, one our favorite teachers. Her job here at Kensington Elementary School is a school guidance counselor. She has been working at K.E.S for 6 months. She has also taught at Kimberg Village School. She has taught 1st and 4th grade classes and she has worked with individual kids. At another school she taught kindergarten and 1st grade in small groups. In that school those were the only grades.*

*Mrs. Poitras says that the most important thing to her is that she creates an important environment where kids are comfortable talking to her about their problems. So then she can help them solve them.*

*She earned a bachelor's degree in family relationships and child development. Then she worked in early intervention and early childhood special education. Next she went back to college at the University of New Hampshire. Finally she came to work at K.E.S after finishing college.*

*She is a great part of our school and we're glad she's here!*
